TO WHOM IT MAY CONCERN

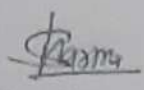

Certified that I have visited the building of MAA BHAGWATI NIKETEN PUBLIC SCHOOL situated at Rajputana Road, at Village Shahzadpur, Distt. Ambala on dated 10.05.2013 & made the following observations:-

That the building is double storied one. The ground floor portion consists of six class room along with covered central verandah, Principle room with dressing room & toilet attech, record room, clerks room, staff room, hall area, waiting room, staff toilet, comptuer room, store, water area, toilets alongwith open play ground, gate, boundry wall & a staircase with ramp leads to first floor level.

The first floor portion consists of six class rooms, lavotaratory, library, computer room, hall room and open terrace only. The same staircases also leads to second floor level.

That the building is constructed with R.C.C. frame structure, first class brick work in cement and sand mortar, cement plaster on walls, Tiels/marble flooring in floors, cement tiles flooring with pavements in open ground, RCC slab roofing with RBC pillers at ragulers intervals, Aluminium cum wooden joinry works tiles at roof levels and fitting of water supply, sanitary and electrcity etc.

In my opinion that the school building is structurally safe, sound and the same is worth living.
